

Global Student Forum-2018 - Albuquerque, NM November 11-16, 2018

Sponsor Students that care about the Future of Global Engineering Education, R&D, Academia, and Entrepreneurship!

- The Global Student Forum is an event that attracts students from around the world with a focus on engineering education. This year's theme is peace engineering. We ask ourselves questions like "How do we educate future engineers to be community-minded about design, innovation and entrepreneurship?" When we design we need to consider criteria of conflict avoidance or/and resolution.
- This event is hosted by the Student Platform for Engineering Education (SPEED). However, this year, many *student organizations* from the University of New Mexico are co-hosting workshops where they provide content from their respective engineering fields. They include:
 - Institute of Electrical and Electronics Engineers (IEEE)
 - Association for Computing Machinery (ACM)
 - American Institute of Aeronautics and Astronautics (AIAA)
 - American Society of Mechanical Engineers (ASME)
 - American Society of Civil Engineers (ASCE)
 - American Institute of Chemical Engineers (AIChE)
 - Engineers Without Borders (EWB)
 - Hispanic Engineering and Science Organization (HESO)
 - Society of Women Engineers (SWE)
- How can you help?
 - Sponsor student attendance through registration fees, costs for meals and lodging
 - Sponsor workshops provided by the *student organizations* of the University of New Mexico
 - Sponsor the local culture night so that the international students can celebrate the culture of New Mexico, and the United States.
- Last year the Global Student Forum was in Kuala Lumpur, Malaysia, and this year will be the first time ever it will be in the United States in Albuquerque, New Mexico.
- This is the first Global Peace Engineering conference in the world and in the USA. Help continue a Peace Engineering movement! Be a part of it with ownership and a sense of belonging.

We want to see you in Albuquerque, Nov. 11-16, 2018!
